24 **Problem Statement:**
25

26 Modern Imaging and Hardcopy Devices and Services can be deployed with uncontrolled access to and storage of
27 restricted documents and resources, thus exposing security and access considerations that have not been fully
28 addressed within current open standards.
29

30 Current long-term goals of the Imaging Device Security Working Group are to:

- 31
- 32 • Develop any required errata to approved specifications developed by the Imaging Device Security Working
 - 33 Group as directed by the PWG Steering Committee.
 - 34 • Establish liaison with the appropriate Common Criteria technical communities to review and provide input
 - 35 on revision or replacement of protection profiles for Hardcopy Devices. Establish liaison with other public
 - 36 standards bodies on security topics and security standards that could apply to Hardcopy Devices.
 - 37

38 **Out-of-scope:**
39

- 40 • OOS-1 Define new encryption algorithms
- 41 • OOS-2 Define new transport protocols
- 42 • OOS-3 Define new application protocols
- 43 • OOS-4 Define new hash functions or digital signatures
- 44 • OOS-5 Define new network endpoint attachment protocols

- 45 • OOS-6 Define new security protocols
- 46 • OOS-7 Define new security token or public key certificate formats

47

48 **Objectives:**

49

- 50 • OBJ-1 Provide liaison with the Common Criteria Multifunction Printer Technical Committee and any
- 51 international Technical Committees formed to update or replace the Hardcopy Device PP v1.0.
- 52 • OBJ-2 Provide liaison and collaboration with other public standards bodies on security topics and
- 53 security standards development that could apply to Hardcopy Devices.
