Page 1 of 1
### AI 028: Jerry Thrasher will send a note to Mike Fenelon to find out if/how it is possible to handle multiple SHVs for the same environment, the same device class, and [possibly] the same SMI number (i.e., PWG)?

### AI 035: Joe Murdock will investigate Microsoft’s method(s) of remediation. [Is it accomplished by passing a URL?]

→ It is accomplished by passing a URL. Will get more details.  
→ **PARTIAL**

### 7. **Review minor NAP spec update**  

- Changed status from Initial Draft to Prototype
- Changed copyright date from 2009 to 2010
- Changed the note about removing this Appendix
- Some minor typo/grammar/spelling corrections

Ira noted that “initial draft” should only be used on one draft, after which the status should be changed to “draft”.
Ira noted that we need to fix some acknowledgements: change Dave Whitehead affiliation to “independent contractor” and Peter Cybuck to Kyocera Mita, and change Ron Bergman’s contact information to be consistent with what appears in IPP 2.0. Check to see if Kevin Sigl is still at HP.

8. **Review issues**

Regarding the PT proposals on the IETF NEA WG web site, there are two TCG-compatible transports and one new alternative from Cisco. There is a special NEA teleconference on January 28 to discuss this topic. We will put this on the agenda for the next IDS teleconference.

No new/existing issues to report.

9. **Next steps**

We are planning for the F2F. It should be a short meeting, maybe just the morning session.

10. **Summary of New Action Items and Open Issues**
