IPP Everywhere v2.0 Client Self-Certification

- Strategy for Client self-certification:
 - Provide an IPP Everywhere test server that records requests and has multiple test queues for different kinds of printers/services
 - Tests:
 - Using required operations and not using deprecated operations
 - Using required attributes
 - Support for presets, other basic features
 - Supporting HTTP Basic and Digest authentication
 - Supporting IPP System Service for print services
 - Sending valid PWG Raster and PDF
- Goal is to provide testing tool and not for absolute conformance (might conflict with other standards?)
