

Semantic Model Workgroup Meeting Minutes May 16, 2016

The Semantic Model Workgroup Conference Call was called to order at approximately 3:00PM EDT May 16, 2016.

1) Attendees

Smith Kennedy (HP)
Daniel Manchala (Xerox)
Paul Tykodi (TCS)
William Wagner (TIC)

2) Agenda

- a) Administrivia (roll call, IP statement)
- b) The minutes of the Semantic Model April face-to-face conference (<ftp://ftp.pwg.org/pub/pwg/sm3/minutes/SMWG-f2f-sm3-Minutes-20160427.pdf>) were accepted without comment.
- c) The outstanding action items were reviewed.
 - i) Draft of JDFMAP prototyping requirements (Bill Wagner): Posted -see discussion below
 - ii) Contact PWG members to prototype JDFMAP pending JDFMAP requirements (Paul): Awaits requirements document
 - iii) Extract and remap names of IPP registry elements (Bill) [[elements-IANA-registry-20160513.xlsx](#)]: Done, but needs more work
 - iv) Extract element name list from schema (Daniel): Feasibility to be determined

3) Discussion

- a) Draft of JDFMAP prototyping requirements
 - i) Reviewed draft posted at <ftp://ftp.pwg.org/pub/pwg/sm3/white/JDFMAP-Prototyping-Requirements.pdf>
 - ii) Minor editorial comments made and implemented
 - iii) Updated and approved version reposted to same address.
 - iv) Paul should proceed with contacting potential prototypers
- b) **SM2/IPP IANA element remapping**
 - i) IANA list with names reformatted to Semantic Model form was posted
 - ii) However, distinction of type of element or element characteristic (Attribute, Keyword Attribute Value, Enum Attribute Value, Operation, or Status Code) was obfuscated. Bill will

continue with list to separate type of element/value, and to identify probable next higher element or SM element to which value si to be attributes, as well as to recover probable time of IANA entry to suggest likelihood that information is already in Semantic Model.

- iii) Daniel will investigate whether elements list can be extracted from current model using Liquid XML or processing of component files.

4) Action Items and Next Steps

- a) Paul to contact PWG members to prototype JDFMAP.**
- b) Bill to continue working on IANA IPP element list for SM2**
- c) Daniel to investigate way to get list of elements from current version of model.**
- d) Next Semantic Model conference call at 3PM EDT on May 30**
