General Discussion

- Harry / Craig shared feedback from DMTF Developer’s Conference and Alliance meetings. Key points (see also Harry’s e-mail):
  - Deprecation is not an issue with the DMTF
  - Definition of “controversial” is solely determined by the PWG CIM WG (not limitation imposed by DMTF)
  - Two joint teleconference are scheduled for January (Harry to write John Crandall for dates).
- Ira suggested we continue with our plan to focus initially on the editorial changes.
- Bill suggested the scope be driven by the time Rick and Ira have to make the changes.
- Rick / Ira suggested that an introduction to the CR be written to identify scope of current CR along with the planned CRs.
- Rick to write the introductory text including the scope. Ira to write initial text with possible “ASCII art”.

</table>
• Ira to “re-think” some of the elements identified in the white paper previously published. Ira to update the specification over Christmas.

• Ira would like input for editorial changes needed to map references to IPP and the MIB.

• January date not hard and fast. Rick suggested we updated the DMTF with our updated plans for 2006.

• The official definition of future work products are:
  o CR/WP#1 Editorial changes and backward compatible technical changes (e.g., new enums). Nothing that affects current implementations. Ira estimates a January 06 completion.
  o CR/WP#2 Deprecation and/or moving attributes (e.g, xxx-current / xxx-defaults) Ira estimates April 06

  NOTE: WP#1 and #2 affect all printing classes.
  o WP#3 new items and extensions. This is a transfer of objects from the current Semantic Model 1.0 and Printer MIBv1/v2. Ira estimates an August 06 completion.
  o WP#4 Additions of the Imaging Classes (new even to Semantic Model)

• WSDM and WS-Management are working to create mapping functions to CIM.

• The work register needs to be modified. Do we target the next CIM Core release? When is it?

**Next Steps / Open Actions:**

• Ira / Rick to provide estimates before our next teleconference.

• Ira will also revise the white paper. Rick to write introductory text for the CR.

• Harry to write John Crandall to get teleconference dates.

• No meeting next week. Next meeting expected on 1/5/06 at 2 p.m..
