

# What's new in IPPFAX/1.0?

- Very small set (5) of operations, all REQUIRED for all Receivers
  - IPP/1.1 has many OPTIONAL operations for Printers
- Sending/receiving user vCards identify source/destination users
  - IPP/1.1 usually only identifies sending/receiving systems

- TCP -> TLS -> HTTP/1.1 setup,  
with REQUIRED data integrity
  - IPP/1.1 has optional upgrade
- HTTP/1.1 -> TLS - less security
- PDF/is Letter/A4 always prints,  
w/out Job/PDL attribute conflicts
  - IPP/1.1 has many OPTIONAL attributes for Printers
