4. Consider whether to continue Cloud Imaging Model effort (vs allow IPP to develop Cloud approach and submit to SM)
  - a. Mike proposal: continue with the effort to ensure that you can deploy an automatic cloud-based MFP solution (once you have an account with the cloud provider)
  - b. Dropping System Control Service extensions prevents automatic configuration and makes it harder to configure and deploy
  - c. Just have System Control Service handle registration and de-registration; registration provides the Proxy with the service endpoints for subsequent sync-up and job processing
  - d. Proxy would poll/wait for notifications from each service, not from system control service
  - e. Defer discussion of notifications to Semantic Model 3.0
