# PWG Patent Statement

---

- PWG standards may include the known use of essential patents and patent applications provided the PWG Chair receives assurance from the patent holder or applicant with respect to patents whose infringement is, or in the case of patent applications, potential future infringement the applicant asserts will be, unavoidable in a compliant implementation of either mandatory or optional portions of the standard. This assurance shall be provided without coercion. This assurance shall be either:
  - a) A general disclaimer to the effect that the patentee will not enforce any of its present or future patent(s) whose use would be required to implement either mandatory or optional portions of the proposed PWG standard against any person or entity complying with the standard; or
  - b) A statement that a license for such implementation will be made available without compensation or under reasonable rates, with reasonable terms and conditions that are demonstrably free of any unfair discrimination.
- The PWG is not in a position to give authoritative or comprehensive information about evidence, validity or scope of patents or similar rights, but it is desirable that any available information should be disclosed. Therefore, all PWG members shall, from the outset, draw PWG's attention to any relevant patents either their own or of other organizations including their Affiliates that are known to the PWG members or any of their Affiliates, although PWG is unable to verify the validity of any such information.

# PWG Working Group Status

# PWG Plenary Status Report WIMS/CIM Working Group

**Printer Working Group  
Face-to-Face Meeting  
April 28, 2009  
Mt. Laurel NJ**

# Purpose of the effort

---

- **The WIMS working group is concerned with:**
  - Supporting the remote management of Hardcopy Imaging devices by the definition of new and the recasting of previously-defined imaging device and service management elements for mapping into standard management semantics and protocols, including but not limited to SNMP, CIM, and Web Services Management
  - Continuing update and extension of the DMTF/CIM classes concerned with Imaging Devices and Services.
  - Continuing support and update of the printer-related PWG and IETF published MIB documents
  - Continuing support and update of the specifications produced by the former PWG MIB Working Group (PMP) as well as by the PWG WIMS Working Group.

# Work Items for the WG

---

- **What We're Doing**

- Supporting the existing IETF and PWG Printer and related MIB documents, including the potential advancement, extension and expansion of these specifications.
- Advancing a basic public management elements structure for Hardcopy Services and Devices that draws upon existing structures and that utilizes a set of management elements that is consistent over the various management protocols and methods.
- Update, Create and Prototype DMTF/CIM Imaging MOFs, with the objective of ensuring Hardcopy Device and Service management via a Web Services approach that is consistent with the basic public management elements structure

- **What We're NOT Doing**

- We are not addressing the delivery of Hardcopy services.
- We are not specifically concerned with security issues related to Hardcopy Devices or Services, although management must recognize and accommodate the requirements and constraints demanded by security.
- We are not defining a management service or protocol.

# Current Activities

---

- Rick Landau is wrapping up a Proxy CIM Provider prototype implementation. Code implementing the CIM to MIB to CIM translation will be available in June. Summary results of CIM interaction derived from MIB dumps is in <ftp://ftp.pwg.org/pub/pwg/wims/cim/proto-testlogs-allfiles-20090420.zip>.
- Ira is working on the update of the Print Service Schema, based on IPP 2.0 semantics and following the considerations of the IPPV2 WG.
- WIMs is investigating the possibility of starting a Imaging Power Management Project.

# Potential MIB Activities

---

- **Printer Port Monitor MIB**
  - update spec
  - interoperability testing ?
  - advance PPM to PWG standard ?
- **Identify Printer MIB Problems**
  - Rick, in doing CIM Proxy, has see some recurrent implementation problems. MIB will be basis for future WS management. Therefore, MIB problems will delay development and/or restrict effectiveness of WS Imaging Management utilities.
  - Users and Fleet Management Agencies both need to understand some of MIB implementation variations, and should have some place to voice the questions.
- **MFD MIB or MIB extensions?**
  - Many attempts, of varying completeness, started in the past, especially MFD Alerts.
  - MFD group is addressing service semantics; need to address management elements

# Next Steps

---

- Proceed with the CIM effort to Print Service.
- Possible initiation of Hardcopy Imaging Device Power Management project.
- CIM Printer Profile
- Printer MIB implementation consistency evaluation
- Attempt at increased contact with user community understand needs and identify real use cases through liaison with fledgling Managed Print Services Association and other user/manager organizations.

# More Info/How to participate

---

# PWG Plenary Status Report IDS Working Group

April, 2009

Mount Laurel , NJ PWG F2F Meeting

Ron Nevo(Sharp), Dave Whitehead, (Lexmark)

# Purpose of the effort

---

- The industry is moving beyond basic authentication for access to corporate networks to a fairly detailed assessment of the device that is connecting before being allowed to access the network.
  - Examples of what's being measured for PC Clients:
    - OS Type, Version, Patch Level
    - Anti-virus Type, Version, Definition Level, Is Active
- Hardcopy Devices attach to networks, but there's no standard set of metrics that is used to assess an HCD.
- Our Goal is to provide these metrics!!!

# Purpose of the effort

---

- The IDS working group is chartered to enable Hardcopy Device support in the Network Assessment Protocols that measure and assess the health of client computers and other devices that are attached to enterprise class networks.
- The group will define a set of common assessment attributes for Hardcopy Devices and will liaison with the specific Network Assessment Protocol efforts to include Hardcopy Device support in these protocols where necessary. In the future, the IDS WG charter may be revised to allow the working group to deal with other types of Imaging Devices (Network Projectors, Displays, etc.) in the Network Assessment Protocols or other security related work items.

# Work Items for the WG

---

- What We're Doing
  - Defining a standard set of metrics that might be measured or assessed in Hardcopy Devices to gauge if they should be given access to a network.
  - Target for now are NAP and NEA.
  - Defining example "bindings" for how these metrics are used in the individual network assessment protocols.
- What We're NOT Doing
  - We are NOT defining any new assessment protocols or assessment extensions to existing authentication protocols.
  - We are NOT endorsing any of the competing network assessment protocols (TNC, NAC, NAP), but plan to enable Hardcopy Devices to participate in any/all of them.

# Administration

---

- IDS WG Chairs:
  - Ron Nevo(Sharp), Dave Whitehead, (Lexmark)
- IDS WG Secretary:
  - Lee Farrell (Canon)
- IDS WG Document Editors:
  - Jerry Thrasher (Lexmark), Brian Smithson (Ricoh)

# Current Status

---

- HCD Assessments Attributes document was developed and is currently in last call.
- HCD-NAP Binding Document under development.
  - Complete in Q2 2009.
- HCD-NEA Binding Document just starting.
  - Target completion date of Q3 2009.
- Discussions with assessment protocol designers (Microsoft/NEA) to finalize and endorse the IDS Binding documents.

# Next Steps

---

- Address last call comments on attributes specification.
- Progress attributes specification last call process to final, approved version 1.0.
- Finish NAP binding specification – (Q2 2009)
- Begin NEA binding specification
- Seek approval/adoption w.r.t. assessment protocol vendors.
