## Errata for: Standard for Media Standardized Names

Section 2 Terminology currently contains the following entry:

**Media Size Self-Describing Name** (or **Media Size** for short) An ASCII string that contains a Media Size Name and the Media Dimensions that correspond to the Media Size Name. Examples: 'iso\_a4\_210x297mm', 'na\_letter\_8.500-x11in', 'na\_monarch\_3.875x7.5in'.

The second example in this paragraph is incorrect. It should read: '**na\_letter\_8.5x11in**'. The specification of the value, as defined in Table 3, part 1, is correct.

The corrected paragraph follows:

**Media Size Self-Describing Name** (or **Media Size** for short) An ASCII string that contains a Media Size Name and the Media Dimensions that correspond to the Media Size Name. Examples: 'iso\_a4\_210x297mm', 'na\_letter\_8.5x11in', 'na\_monarch\_3.875x7.5in'.
