PWG Plenary Status Report
IDS Working Group

February 03, 2014

Irvine, CA

Purpose of the effort

- IDS is investigating and defining standards for addressing general security attributes for imaging devices and services. Our general goals are to:
 - Define standard metrics and protocol bindings to assess the health of Hardcopy Devices to gauge if they should be granted access to a network.
 - Define a set of standard security and policy attributes and values for authorizing Hard Copy Devices, their services and users in a global workspace
 - Provide a general security model for other PWG standards to reference
- IDS is also providing an anonymous path for vendors to review and contribute to the definition of new Common Criteria MFP Protection Profiles
