

## Internet Printing Project Conference Call - March 12, 1997

The meeting was called to order at 4:05 PM EST.

Attendees:

Bob Herriott - Sun  
Carl-Uno Manros - Xerox  
Roger Deby - IBM  
Peter Zehler - Xerox  
Randy Turner - Sharp  
Don Wright - Lexmark  
Tom Hastings - Xerox  
Scott Isaacson - Novell  
Steve Zilles - Adobe  
Lee Farrell - Canon  
Dave Kellerman - Northlake Software  
Jeff Copeland - QMS  
Mabry Dozier - QMS  
Patrick Powell - San Diego State

Agenda:

- Requirements Document
- Security
- Documentation Requirements

### REQUIREMENTS

There have been a number of suggestions that additional scenarios or more scenarios be added. Roger Deby suggested that the requirements should be more general and that the model document would be more specific while the requirement document should be more general.

Are there too many scenarios in the document? Are there too many error cases in the document.

Review of the comments and notes proposed by the mailing list.

Requirements document to be silent on the actual implementation of a non-spooling printing.

Requirements document must state support for printer drivers that generate and transmit the document on the fly without know the length of the document ahead of time. We should remove the specific "chunking" flows in the scenarios. The end-user requirement is that the end-user needs to be able to determine the status of his print job even while the job is still spooling.

Requirement - server can terminate the session before the whole job has been submitted

## PROTOCOL

Bob Herriott reviewed the work done at the protocol meeting last Friday. Minutes of that meeting will be issued shortly. Randy Turner and Scott Isaacson will be issuing whitepapers in key areas of the protocol workbased on this meeting.

## SCHEDULE

We will continue to drive to the existing schedule for document creation. It was felt that moving the schedule out at this time would only delay the documents more.

## IETF AGENDA

We should limit discussion at the meeting to the PROTOCOL and SECURITY documents and keep the discussion on REQUIREMENTS and MODELING documents very light.

Carl-Uno will create an agenda and distribute it to the mailing list.

## AUSTIN AGENDA

Major time at the Austin meeting should be spent on Model and Protocol with some time spent on Security.

Scott Isaacson has create a version 1.6 Model document containing a major re-write of the front sections.

## GENERAL DISCUSSION

Discussion on the WEB Page and how to organize it.  
We have a pointer to our WEB page on the Application's area WEB Page.  
The FAQ needs to be reviewed by everyone with comments sent to Carl-Uno.

A request was made by Patrick Powell to use an 800 number for the conference call. No one wanted to offer up and pay for an 800 number for this call. It was felt that spreading the cost among the participants was the most equitable solution.

The meeting adjourned at 6:05 PM EST
