

Given that we have the Media Standardized Names document open for editing, I'd like to propose we add the following to the appropriate tables and to the IANA keyword registry.

### **To Table 6 and the IANA keyword registry add:**

jpn\_kaku3\_216x277mm  
jpn\_kaku4\_197x267mm  
jpn\_kaku5\_190x240mm  
jpn\_kaku7\_142x205mm  
jpn\_kaku8\_119x197mm

(Note: kaku6 is listed on the reference as the same as ISO C5 so we need to decide if we add it or not...I don't see any reason not to add the name with a reference to the ISO size.)

Reason: kakugata is a type of Japanese square-like envelope. There is a listing in the current draft of MSN 2.0 for kaku 2 called (jpn\_kaku2\_240x332mm) but not for the other six sizes listed in the reference.

<http://www.edsebooks.com/paper/env.html>

Also add:

om\_chou40\_90x225mm

Reason: Choukei is a rectangular Japanese envelope where the opening is on the short end. There is a standard size of choukei 4 in the MSN 2.0 draft, called (jpn\_chou4\_90x205mm). (Note that since this is NOT listed as a JIS standard size it should get an "om" prefix, not "jpn").

## **To Table 5 and the IANA keyword registry add:**

om\_medium-photo\_130x180mm

Reason: The paper size 130x180mm is a European photo media size. There is a small size (om\_small-photo\_100x150mm) and a large size (om\_large-photo\_200x300) defined in the MSN 2.0 draft. (Note: The referenced link points to Epson branded photo paper)

<http://www.fileone.ie/Paper-Photo-Size>

Also add:

om\_wide-photo\_100x200mm

Reason: This size is mentioned as a wide borderless photo media size. (Note the referenced link is to a Canon branded dedicated photo printer).

## **To Table 4 and the IANA keyword registry add:**

iso\_ra3\_305\_430mm

iso\_ra4\_215x305mm

iso\_sra3\_320x450mm

iso\_sra4\_225x320mm

Reason: The sizes are listed in the ISO standard untrimmed raw paper sizes in ISO 217 but are not in the current MSN2.0 draft.
